Policies for education of Slow learner and Advance Learner

During the path of teaching and learning process teachers have to deal with different types of learners. For example, Some students are very intelligent and can acquire learning very rapidly, some learn at average rate and some are very weak and slow in learning. On the basis of learners level of learning students are categorized as slow and advance learner. Institute has tried to develop a policy to deal with different type of learners. The Policy improves the learning capacity of both slow and advance learner.

Slow Learner - Those learners who are unable to deal with academic skills and activities what advance learner will do in normal classroom. Due to poor and slow grasping powers or some other reasons. The regular classroom curriculum and learning are applicable to slow learner with remedial education.

Advance Learner - Those learners who can learn faster and remember for long period of time than the slow learner and have strong grasping power. If proper experiences are provided they can be the future innovators, problem solvers or evaluators.

The process of Identification

To identify slow and advance learner following inputs are considered.

1. Overall result of previous examination
2. Result of Prerequisite test.
3. Result of internal assessment (Unit test)
4. Class observation of subject teacher.

The slow and Advanced learners would be identified for each subject separately by respective subject teacher for all programs combined with class co-ordinator.

The process of identification would be conducted after declaration of preceding exam result, considering class performance in existing academic session and personal observations of subject teacher.

Subject teacher's observation should be recorded as per student's attendance and performance in class.

- A report would be prepared for whole class of Unit Test of 30 Marks. Where previous examination result where student fail in more than 3 subjects are slow learner and others are advance learner.
- Marks obtained in prerequisite test below or above 40% marks will be considered slow or advance learner respectively.
- The student securing marks below 40% would be identified as slow learners.
- The student securing marks above 40% would be identified as advance learner.

Strategies to deal with slow learner

Considering the characteristics of slow learner, following strategies may be adopted to deal with their problems.

1. Extra classes are conducted with appropriate focus on subject or topic in which students are found slow.
2. Individual academic counseling is done by concerned subject teacher.
3. Students are asked to solve extra assignments.
4. Personal counseling is done through mentoring (Teacher guardian) scheme which takes care of the students mentors maintain the entire academic record of the student which is also conveyed to the parents time to time by the teacher guardian. Slow learners are counseled and motivated by the mentors.

Special activities conducted for Advanced Learners

1. Encourage students to enroll and register for NPTEL courses.
2. Guiding for career planning.
3. Discussion on the advanced topic.
4. Guiding the students for Competitive Examinations.
5. Arranges Training programs for gaining advanced technical knowledge.
6. Encourage students to participate in various symposiums like online internships, quiz, poster presentation, Conferences, inter institution competition etc.

Extra Assignment

Jawahar Education Society's Institute of Technology, Management and Research, Nashik

Information Technology (2024-25)

Assignment Name : ADBMS Compulsory Assignment

Assignment Set : ADBMS Compulsory Assignment

Subject : Elective-I (Advanced Database and Management System) - Theory (**Elective**)

Faculty : Jayashree Patil | **Group :** Semester 5 | **Marks :** 30

1) Compare Relational and Object Oriented databases.

Mark(s) 5.00
Type DESCRIPTIVE

Course Outcome- CO1

Blooms Level- Evaluate,Analyze,Understand

2) Explain Shared Memory and Shared Disk Parallel Database Architectures.

Mark(s) 5.00
Type DESCRIPTIVE

Course Outcome- CO2

Blooms Level- Evaluate,Understand

3) Explain NoSQL database Development Tool: MapReduce.

Mark(s) 5.00
Type DESCRIPTIVE

Course Outcome- CO3

Blooms Level- Create,Evaluate,Apply,Understand

4) Write a note on Decision support system. Explain with example views and Decision support.

Mark(s) 5.00
Type DESCRIPTIVE

Course Outcome- CO4

Blooms Level- Evaluate,Understand

5) Explain different issues in Data mining task. Explain Data Preprocessing Tasks in KDD Process.

Mark(s) 5.00
Type DESCRIPTIVE

Course Outcome- C05

Blooms Level- Evaluate, Understand

6) Explain multimedia databases in detail with respect to characteristics and challenges.

Mark(s) 5.00
Type DESCRIPTIVE

Course Outcome- C06

Blooms Level- Evaluate, Understand

Assignment NO-07

1] compare Relational and object oriented database.

Relational

object oriented database

1] Data is stored in tables

1] Data is stored in objects

2] Amount of data it can handle large amount of data

2] It can handle larger and complex data

3] Types of data -
Relational database has single type of data

3] It can handle different types of data.

4] Learning relational database is a bit complex

4] object oriented database is easier to learn as compared to relational database.

5] Data is stored in the form of tables.

5] Data is stored in the form of objects.

2] Explain shared memory and shared disk parallel Database Architecture.

→

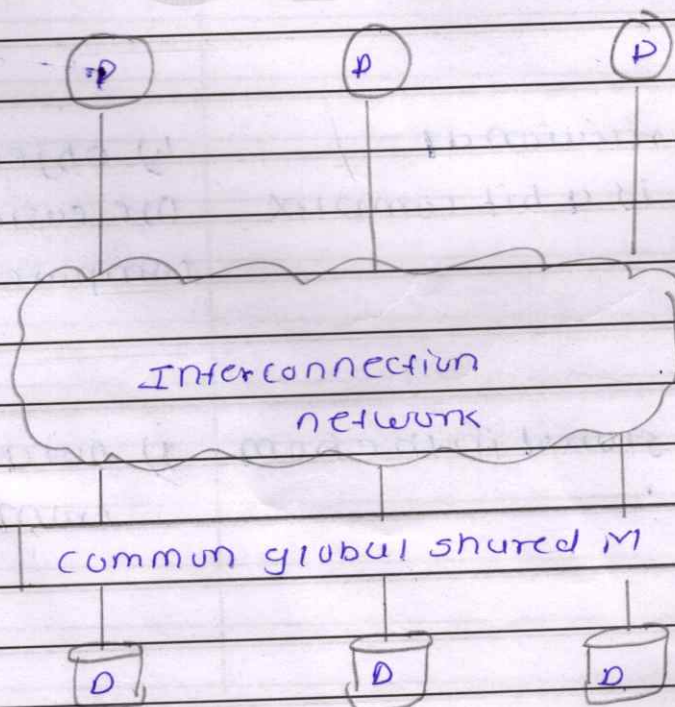

shared memory -

multiple CPUs are attached to a common global shared memory via interconnection networks or communication bus.

shared memory architectures usually have large memory caches at each processor, so that referencing of the shared memory is avoided whenever possible.

Advantage - Efficient communication between processes

disadvantage - Bandwidth problem

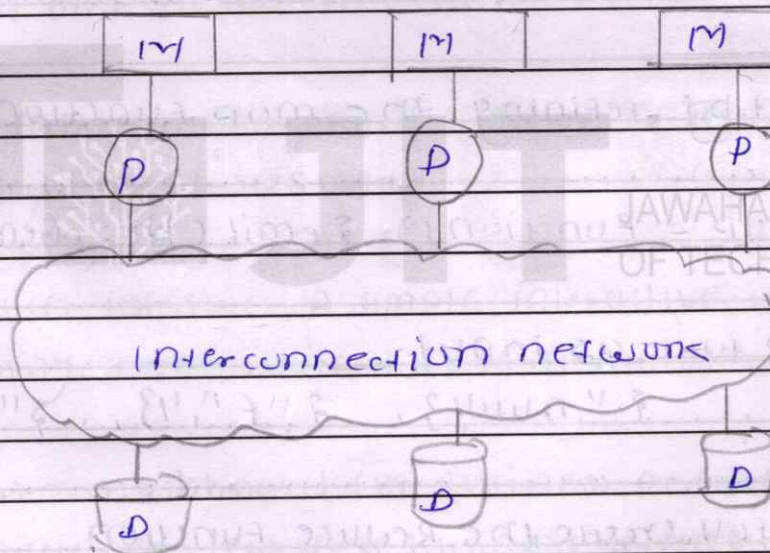

Shared disk system-

multiple processor can access all disk directly via inter communication networks. BUT, every processor has local memory.

shared disk has two advantage.

- Each processor has its own memory, the memory bus is not a bottleneck.
- System offers simple way to provide a degree of fault tolerance.

3)

Explain NOSQL database development tool. map reduce

Map-Reduce is a data processing paradigm for condensing large volumes of data into useful aggregate results.

To perform reduce operation, MongoDB provides the `mapReduce` database command.

In this map-reduce operation MongoDB applies the map phase to each input document. The document in the collection that match the query condition.

The map function emits key-value pairs. For those key have multiple values, MongoDB applies the reduce phase.

MongoDB then stores the results in collection.

Let's start by defining the map function.

```
> var map = function () { emit (this.Gender, 1); }
```

This step take as input:

```
{ "null": 1 }, { "F": 1 }, { "M": 1 }
```

Next, you create the reduce function.

```
> var reduce = function (key, value) { return Array.sum(value); }
```

Q4) Write a note on decision support system. Explain with ex view and decision support.

→ A decision support system is an interactive computer-based system that helps individuals and organization make decisions by analyzing large amounts of data and presenting it in a form that is easy to interpret.

Features-

1) Data management - stores and manages large amount structured and unstructured data.

2) Model management - provides access to models that simulate different scenarios.

3) User interface - A simple interactive interface that helps users easily manipulate data, run models, and generate reports.

Ex view - Dashboard for Business performance.

A typical DSS view in a business setting could be a dashboard displaying key performance indicators such as sales figures, inventory levels, and profit margins.

DSS - 1) Identifying problems - helps users recognize areas where decision need to be made.

2) Analyzing Alternatives 3) providing insights.

Q] Explain different issues in data mining task. Explain data preprocessing tasks in KDD process.

→

Data quality - The quality of the data plays a crucial role in the data mining process. Issues such as noise, missing data, and outliers can distort patterns, leading to incorrect results.

Scalability - As datasets grow larger and more complex, data mining algorithms need to be efficient in handling massive amounts of data without compromising on performance or accuracy.

Data privacy and security -

Data mining can reveal sensitive information, leading to privacy concerns. Proper anonymization and secure techniques are essential to ensure user data remains protected.

High dimensionality -

In cases where data has a large number of features, processing it becomes computationally expensive.

Overfitting - Occurs when a model learns the noise in the data rather than the actual patterns.

6] Explain multimedia database in detail with respect to characteristics and challenges.

→ A multimedia database is a type of database that stores multimedia data, such as images, audio, video, and complex data types allowing for efficient storage retrieval and management.

characteristics -

1) complex data types -

unlike traditional database that store simple data types. ex. text, numbers. multimedia databases handle complex data types such as audio, video, images, animation.

2) large storage requirements.

3) temporal and spatial data

4) content-based retrieval

5) heterogeneity.

challenges in multimedia databases -

1) efficient storage and compression

2) query processing and retrieval.

3) data synchronization

4) multimodal data integration.

5) scalability.

Extra Assignment, No. 1.

Date : _____

Q.1. List and explain following types of network

i) LAN ii) MAN iii) WAN iv) ADHOC

=> i) LAN :- (Local Area Network)

- > A LAN connects computers within a limited area such as home office or building.

- > Technology used :- Ethernet, Wi-Fi

- > Range :- A few meters to a few km

- > High data transfer rates and low latency
example :- office network, Home Wi-Fi

ii) MAN (Metropolitan area network) :-

- > Connect a city or a large campus

- > uses high speed transmission media like fiber optics.

- > Connect with LAN

- e.g. Cable to network, city-wide, Wi-Fi

iii) WAN (Wide Area Network)

- > large geographical area, wireless, continents

- > uses router and public network like internet

- > lower data rate and higher latency than LAN'S.

iv) ADHOC (Ad hoc Network) :-

- > A decentralized wireless network without a central infrastructure

- > Device Communicate directly with each other
- > Dynamic Topology often used in temporary sensor, disaster recovery, military.

Q.2. Explain with neat and clear diagram following topologies. i) Bus ii) Star iii) Ring iv) mesh
v) Tree vi) Hybrid.

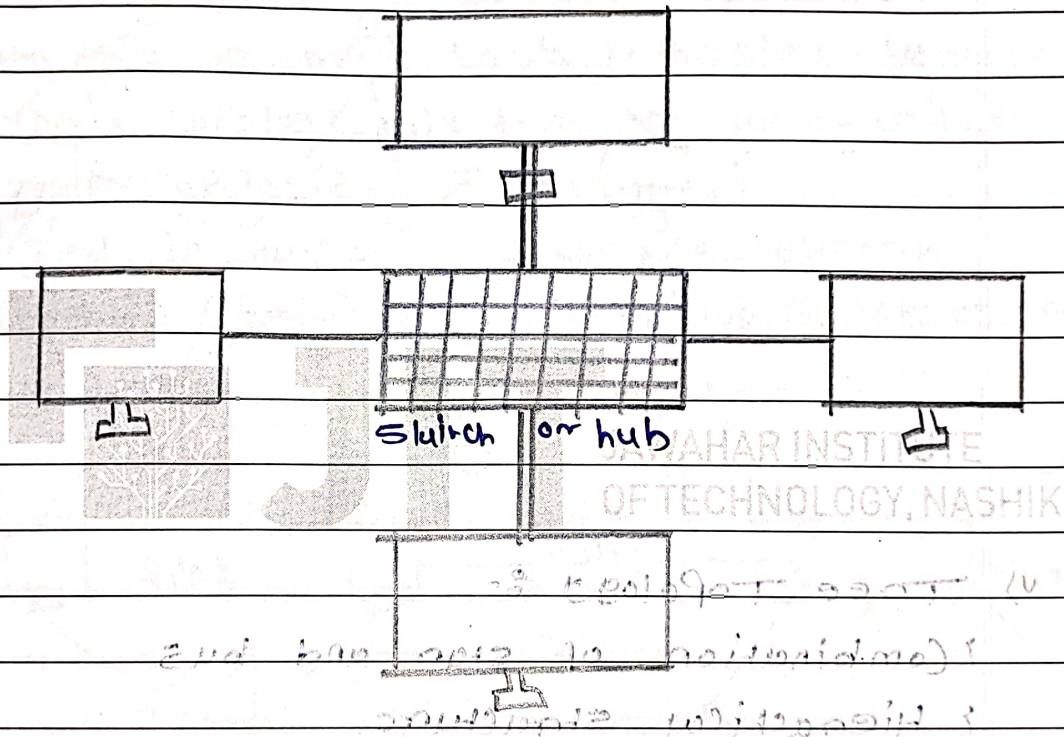

- ⇒ i) → Bus Topology :-
- > Single Backbone Cable all devices share this medium.
 - > Terminators at both ends.
 - > Failure of main cable crashes network.

Fig. :- Bus Topology. A)

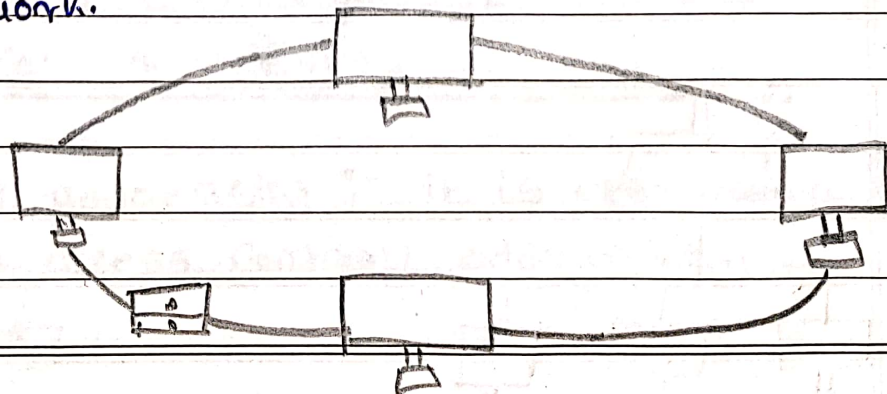

11)* Star Topology :-

- 1) Central switch/hub to which nodes are connected.
- 2) Easy to manage and safe.
- 3) Failure of central hub/switch can affect entire network.

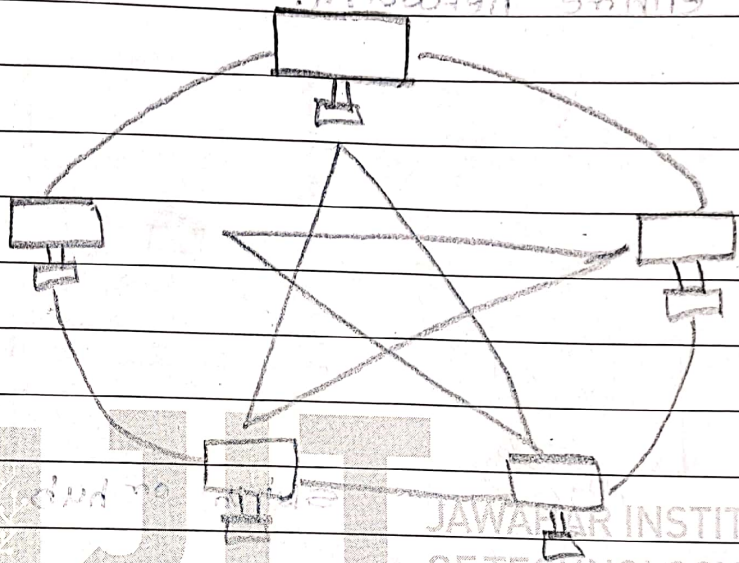

12)* Ring Topology :-

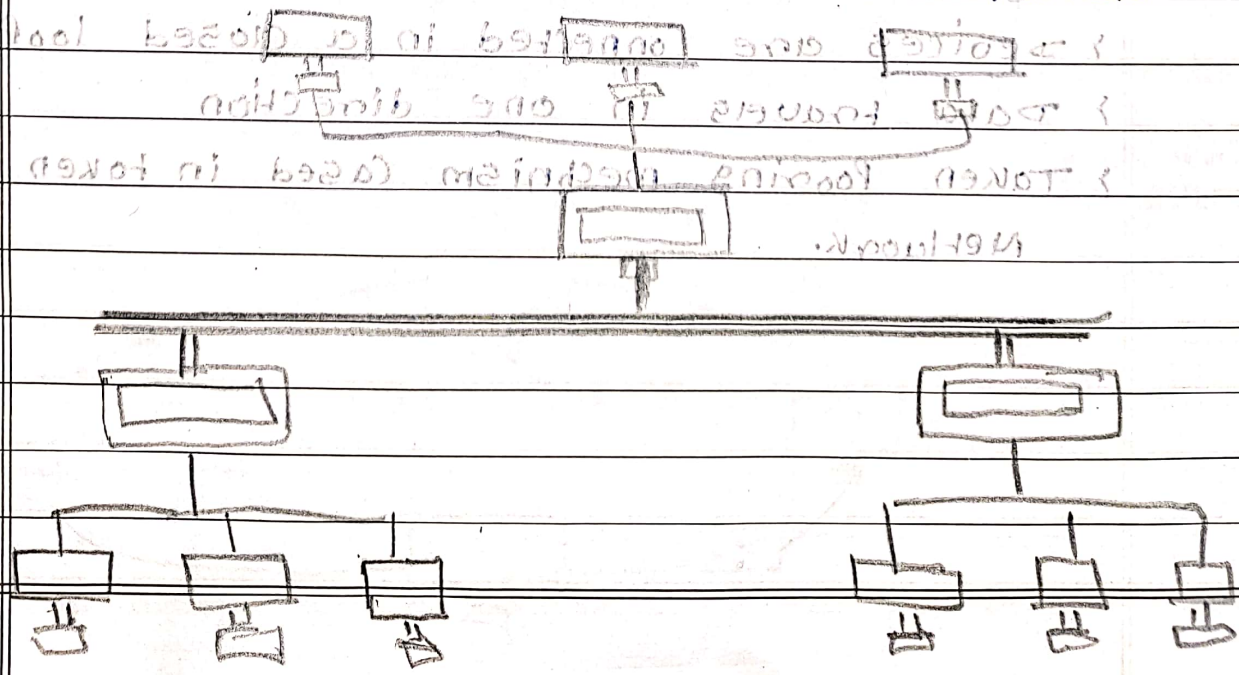

- > Devices are connected in a closed loop.
- > Data travels in one direction.
- > Token passing mechanism used in token ring network.

- iv) Mesh Topology :-
- 1) Every node Connected to every other node
 - 1 High redundancy and fault tolerance
 - 1 expensive due to cabling.

- v) Tree Topology :-
- 1 Combination of star and bus
 - 1 Hierarchical structure
 - 1 Scalable and support future expansion

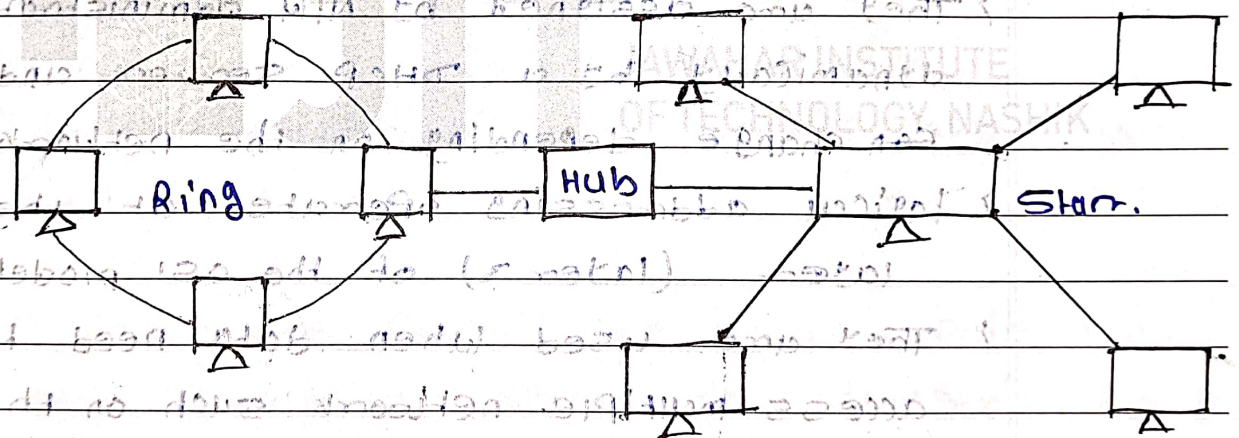

Advantages

- > Scalable
- > Hierarchical Structure
- > Combines strengths of star and bus.

iv) Hybrid topology

- > Hybrid topology is the one which makes use of two or more basic topologies together.
- > Hybrid topology mix two or more different basic topologies (star, ring)
- > used in large and complex networks.
- > Combine benefits of individual topologies.

Q. 3) Write short notes on types of addressing in Computer network.

- > Physical addressing
- > Logical addressing.

Physical addressing is it is also known as mac (media access control) addressing.

1. it is unique hardware address assigned to N/w interface card (NIC) by manufacturer
2. The layer 2 addressing operates at the data link layer of the OSI model

3. mac address are used for communication within the same local area network (LAN)

4. They are 48-bit address written in the hexadecimal format.

5. Logical addressing:-

6. It refers to IP (Internet Protocol) addressing

7. They are assigned by N/w administrator as dynamically by a DHCP server and they can change depending on the network.

8. Logical addressing operates at the N/w layer (layer 3) of the OSI model

9. They are used when data need to travel across multiple network such as the internet

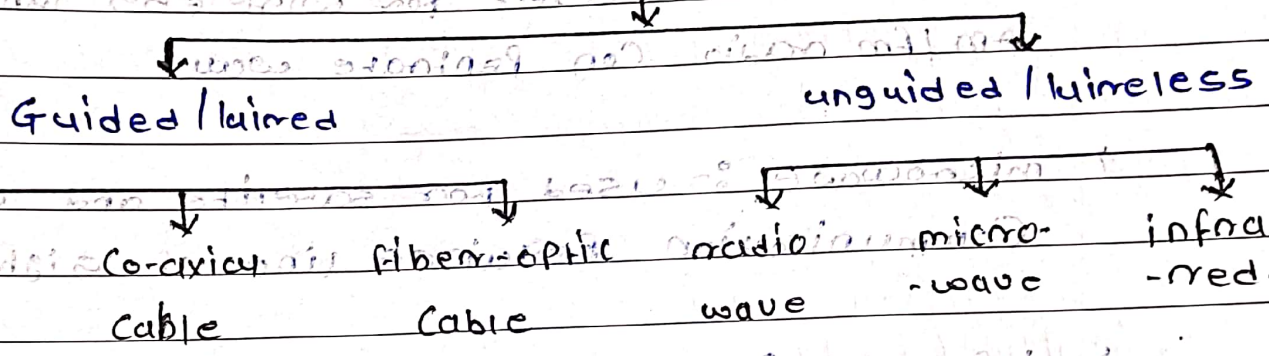

10. They can be use IPV4 and IPV6. IPV4. 32 bit addressing, IPV6. 128 bit addressing

11. When data is sent across the internet uses the destination IP address to reach the correct host.

12. Explain various type of transmission media in brief with neat diagram.

Transmission media are the physical pathways through which data travel betⁿ device in a Computer network.

Transmission media.

1) Guided :- Guided media is wired which carries data from one point to other point.
ex. Twisted Pair Cable, Co-axial Cable, Fiber-optic Cable.

1) Twisted Pair Cable :- the twisted pair cable two insulated copper wire twisted together.

2) Fiber optic Cable :-

→ light is emitted from one end using a light source such as led or light emitting Diode.

→ at the other end it is detected by a photo detector such as photodiode or photo transistor.

Activities for Advance Learner

Internships

Department: Information Technology

This Is To Certify That

/Mrs./ Miss. Ashwajit Shivaji Pandit
Successfully Completed Course of Full Stack Java
Between 20th December 2024 To 23rd January 2025
His/ Her Performance Is Good
and Grade Is 'A'

INSTITUTE OF TECHNOLOGY,
MANAGEMENT & RESEARCH, NASHIK.**

(Approved by AICTE, New Delhi, DTE, Government of Maharashtra, Affiliated to Savitribai Phule Pune University)

NPTEL ONLINE CERTIFICATION

(Funded by the MoE, Govt. of India)

This certificate is awarded to
BORSE ATHARV JIBHAU
for successfully completing the course

Data Analytics with Python

with a consolidated score of **55** %

Online Assignments	24.38/25	Proctored Exam	30.62/75
--------------------	----------	----------------	----------

Total number of candidates certified in this course: 10022

Prof. Kaushik Ghosh,
Professor (Chemistry)
Coordinator CEC

Jan-Apr 2025
(12 week course)

Prof. Ranjana Pathania,
Professor (BSBE)
Coordinator (NPTEL)

Indian Institute of Technology Roorkee

Roll No: NPTEL25CS17S1253500180

To verify the certificate

No. of credits recommended: 3 or 4

Workshop / Seminar on Emerging Technology

Report on Hands-On Workshop on HTML & CSS

Report on Hands-On Workshop on HTML & CSS	
Event Topic	Report on Hands-On Workshop on HTML & CSS
Event Date	10 th to 12 th September 2024
Event Day	Tuesday to Thursday
Event Time	10.00 PM to 4.00 PM
Resource Person Name & Designation	Mr.Deepak Shinde
Agency/Organization of resource person	Code Drift,Nashik
Year of student participated	SE Computer ,AI&DS
Name of staff coordinator	Prof. C.N.Patki
Name of Department who conducted Event	Department of AI&DS
Summary of Program	Mr.Deepak, delivered a wonderful session and guided students about HTML&CSS
Objective of Program	To understand HTML & CSS and its working & need PO5:- Modern Tool -Usage Create, select, and apply appropriate techniques, resources, and modern Engineering and ITtools including prediction and modeling to complex Engineering activities with an understanding of the limitations . PSO1 Professional Skills-The ability to understand, analyze and develop computer programs in the areas related to algorithms, system software, multimedia, web design, big data analytics, and networking for efficient design of computer-based systems of varying complexities

Outcomes of Program	CO3: Design and analyze real world engineering problems by applying set theory, propositional logic and to construct proofs using mathematical induction.

Report on Expert Session on “Salesforce Training”.

Report on Expert Session on “Salesforce Training”.	
Event Topic	Report on Expert Session on “ Salesforce Training ”
Event Date	24 th June 2024
Event Day	Monday
Event Time	10.00 PM to 12.00 PM
Resource Person Name & Designation	Mr. Parag Kothawade
Agency/Organization of resource person	Future Monk,Nashik
Year of student participated	SE,TE,BE Computer ,AI&DS
Name of staff coordinator	Prof. C.N.Patki
Name of Department who conducted Event	Department of Computer
Summary of Program	Mr.Parag , delivered a wonderful session and guided students about SalesForce .
Objective of Program	To understand salesforce and its working & need PO5:- Modern Tool - Usage Create, select, and apply appropriate techniques, resources, and modern Engineering and IT tools including prediction and modeling to complex Engineering activities with an understanding of the limitations . PSO1 Professional Skills-The ability to understand, analyze and develop computer programs in the areas related to algorithms, system software, multimedia, web design, big data analytics, and networking for efficient design of computer-based systems of varying complexities

Outcomes of Program	CO3: Design and analyze real world engineering problems by applying set theory, propositional logic and to construct proofs using mathematical induction.

Report on Expert Session on “Awareness on Cyber Security”.

Report on Expert Session on “Awareness on Cyber Security”.	
Event Topic	Report on Expert Session on “Awareness on Cyber Security”
Event Date	9 th Jan 2025
Event Day	Monday
Event Time	03.00 PM to 04.00 PM
Resource Person Name & Designation	Mr.Tanmay Dixit
Agency/Organization of resource person	Cyber Sanskar ,Nashik
Year of student participated	ALL students Computer ,AI&DS
Name of staff coordinator	Prof. C.N.Patki
Name of Department who conducted Event	Department of Computer
Summary of Program	Mr.Tanmay , delivered a wonderful session and guided students about Cyber Security.
Objective of Program	To understand various options to study abroad PSO1- Professional Skills-The ability to understand, analyze and develop computer programs in the areas related to algorithms, system software, multimedia, web design, big data analytics, and networking for efficient design of computer-based systems of varying complexities PO5- Modern Tool Usage- Create, select, and apply appropriate techniques, resources, and modern Engineering and IT tools including prediction and modeling to complex Engineering activities with an understanding of the limitations

Outcomes of Program	CO6: Solve problems for multi-core or distributed or concurrent environments.
