Savitribai Phule Pune University

Circular No. 92 of 2023

Dates of Commencement and Conclusion of the Academic Year 2023-24 for Affiliated Colleges and Institutes.

It is hereby informed that, the dates of commencement and conclusion of the First and Second term of Courses, under the faculty of **Science & Technology**, for the academic year 2023-24 shall be as under:

Term – I

Sr. No.	Course, Programme, Year	Commencement	Conclusion	Tentative Commencement Exam	Vacation	
					From	To
1	Science	20/06/2023	31/10/2023	01/11/2023	01/11/2023	21/11/2023
2	B.E.: II	10/08/2023	04/12/2023	06/12/2023	07/12/2023	25/12/2023

NOTE :

1. The dates of commencement and conclusion of the all those courses whose admission is made under Common Entrance Test (CET) conducted by Government of Maharashtra / Savitribai Phule Pune University will be declared separately.
2. In case, the Head of the college requires to give additional holidays in exceptional circumstances, he/she may do so by compensating the same by keeping the college working on holidays.

Pre-Requisite Question Paper		
SEM – I	Subject: Basics of Computer Network(214445)	
Class: SEIT	Prerequisite Courses: : Basics of communication	
Marks: 30	Time: 1 Hrs	
Instructions:		
1. Each Questions Carries 2 Marks		
2. All Questions are Compulsory		
Question No	Question	Answer
1	1. ____ means communication without words. a. Object communication b. Written communication c. Oral communication d. Non-verbal communication	d
2	2. The person who transmits the message is called ____. a. receiver b. sender c. channel d. response	b
3	3. ____ aims at making people work together for the common good of the organisation. a. communication b. combination c. conversation d. connection	a
4	4. At each stage of communication there is a potentiality of interference, which may hinder the process. Such interference is referred to as. a. sender b. receiver c. barrier d. none of them	c
5	5. Normally, communication is ____ in which the information or message is transferred from one person to another. a. important b. interpersonal c. personal d. impersonal	b

6	6. What connects the sender to the receiver? a. Channel b. Communication c. Noise d. feedback	a
7	7. The ____ in the usage of words may be a severe barrier to effective communication. a. disturbance b. discrimination c. disorder d. distortion	d
8	8. Communication between the members of an organization within itself is ____. a. external b. formal c. informal d. internal	d
9	9. As means of communication, e-mails have features of the immediacy of ____ and ____. a. reading, receiving b. writing, sending c. calling, receiving d. receiving, sending	d
10	10. The primary goal of communication is ____? a. to create noises b. to create barriers c. to effect a change d. none of these	c
11	11. ____ is an exchange of ideas, opinions, facts, or emotions by two or more persons. a. communication b. combination c. conversation d. connection	a
12	12. Communication by ____ and ____ is called verbal communication? a. written material and gestures b. body language and gestures c. spoken words and written material d. gestures and spoken words	c
13	13. Which is the study of touches as non-verbal communication? a. haptics b. body language c. gestures d. prosody	a

14	14. _____ is the manner in which your speech is presented. a. encoding b. noise c. channel d. delivery	d
15	15. communication is sharing information between two or more persons with continuous _____. a. Feedback and understanding b. Sender and receiver c. Participating actively d. Sharing	a

DEPARTMENT OF INFORMATION TECHNOLOGY			
TEACHING PLAN, 2023-2024 [SEM-II]			
Name of Faculty:	Prof. S. B. Patil	Designation:	Assistant Professor
Subject:	Database Management System	Subject Code:	214452
Class:	S.E. IT	Marks:	100(30 In-Sem+70 End-Sem)
TH/ PR (Hrs/Week):	3 Hrs/Week	Total Hrs as per SPPU	36 Hrs
Credits:	03	Extra Lecture requires:	04 Hrs

Lecture No.	Date	Topics to be covered	
01	10 Jan to 12 Jan	General Introduction of the Subject, Syllabus, Lesson Plan & Examination Pattern, Prerequisite test	Projector, Green board, Chalk, Duster
UNIT - I Introduction to DBMS			
02	15 Jan to 19 Jan	Introduction: Basic concepts, Advantages of DBMS over file processing systems.	Projector, Green board, Chalk, Duster
03		Data abstraction, Database languages.	Projector, Green board, Chalk, Duster
04		Data models, Data independence.	Projector, Green board, Chalk, Duster
05	22 Jan to 26 Jan	Components of a DBMS, Overall structure of DBMS.	Projector, Green board, Chalk, Duster
06		Multi-user DBMS architecture, System catalogs, Data Modeling: Basic concepts.	Projector, Green board, Chalk, Duster
07	29 Jan to 02 Feb	Entity, attributes, relationships, constraints, keys.	Projector, Green board, Chalk, Duster
UNIT - II Relational Model			
8	29 Jan to 02 Feb	ER and EER diagrams: Components of ER model, Conventions.	Projector, Green board, Chalk, Duster
9		Converting ER diagrams into tables.	Projector, Green board, Chalk, Duster
10	05 Feb to 09 Feb	Relational Model: Basic concepts, Attributes and Domains.	Projector, Green board, Chalk, Duster
11		Codd's rules.	Projector, Green board, Chalk, Duster
12		Relational Integrity: Nulls, Entity, Referential integrities, Enterprise constraints.	Projector, Green board, Chalk, Duster
13	12 Feb to 16 Feb	Views, Schema diagram.	Projector, Green board, Chalk, Duster
UNIT - III Introduction to SQL - PL/SQL			
14	12 Feb to 16 Feb	Introduction to SQL: Characteristics and advantages SQL Data Types.	Projector, Green board, Chalk, Duster
15		Literals, DDL, DML, SQL Operators.	Projector, Green board, Chalk, Duster
16	19 Feb to 23 Feb	Tables: Creating, Modifying, Deleting.	Projector, Green board, Chalk, Duster
17		Views: Creating, Dropping, Updation using Views, Indexes, Nulls.	Projector, Green board, Chalk, Duster

18	26 Feb to 01 Mar	SQL DML Queries: SELECT query and clauses.	Projector, Green board, Chalk, Duster
19		Set operations, Tuple Variables, Set comparison, Ordering of Tuples.	Projector, Green board, Chalk, Duster
20		Aggregate Functions, Nested Queries, Database Modification using SQL Insert, Update, Delete Queries.	Projector, Green board, Chalk, Duster
21	04 Mar to 08 Mar	Stored Procedure, Triggers.	Projector, Green board, Chalk, Duster
22		Programmatic SQL : Embedded SQL, Dynamic SQL, ODBC.	Projector, Green board, Chalk, Duster
UNIT-IV Database Design & Query Processing			
23	11 Mar to 15 Mar	Relational Databases Design: Purpose of Normalization, Data Redundancy and Update Anomalies.	Projector, Green board, Chalk, Duster
24		Functional Dependencies. The process of Normalization: 1NF.	Projector, Green board, Chalk, Duster
25		2NF, 3NF, BCNF.	Projector, Green board, Chalk, Duster
26	18 Mar to 22 Mar	Introduction to Query Processing: Overview, Measures of Query cost.	Projector, Green board, Chalk, Duster
27		Selection and Join operations, Evaluation of Expressions.	Projector, Green board, Chalk, Duster
28		Introduction to Query optimization: Estimation, Transformation of Relational Expression.	Projector, Green board, Chalk, Duster
UNIT-V Transaction & Concurrency Control			
29	25 Mar to 29 Mar	Transaction Management: Basic concept of a Transaction, Properties of Transactions, Database Architecture, Concept of Schedule, Serial Schedule.	Projector, Green board, Chalk, Duster
30		Serializability: Conflict and View, Cascaded aborts Recoverable and Non-recoverable Schedules.	Projector, Green board, Chalk, Duster
31	01 Apr to 05 Apr	Concurrency Control: Need Locking methods Dead locks,	Projector, Green board, Chalk, Duster
32		Time stamping Methods. Optimistic Techniques, Multi-version Concurrency Control.	Projector, Green board, Chalk, Duster
33		Different crash recovery methods: Shadow-Paging.	Projector, Green board, Chalk, Duster
34	08 Apr to 12 Apr	Log-based Recovery: Deferred and Immediate, Check Points.	Projector, Green board, Chalk, Duster
UNIT-VI Advanced Databases			
35	08 Apr to 12 Apr	Database Architectures: Centralized and Client-Server Architectures, 2 Tier and 3 Tier Architecture.	Projector, Green board, Chalk, Duster
36	15 Apr to 19 Apr	Introduction to Parallel Databases, Key elements of Parallel Database Processing, Architecture of Parallel Databases.	Projector, Green board, Chalk, Duster
37		Introduction to Distributed Databases, Architecture of Distributed Databases, Distributed Database Design.	Projector, Green board, Chalk, Duster
38		Emerging Database Technologies: Introduction, No SQL Databases- Internet Databases.	Projector, Green board, Chalk, Duster
39	22 Apr to 26 Apr	Cloud databases, Mobile Databases.	Projector, Green board, Chalk, Duster
40		SQLite database, XML databases.	Projector, Green board, Chalk, Duster

A.Y. 2023-24 (SEM-I)

List of Experiments

Subject: Object Oriented Programming Lab (214448)

Class: SEIT (2019 Course)

Sr.No.	Name of Experiment	CO
1	Design a class 'Complex' with data members for real and imaginary part. Provide default and Parameterized constructors. Write a program to perform arithmetic operations of two complex numbers.	Classes and object -- CO1 and CO2
2	Identify commonalities and differences between Publication, Book and Magazine classes. Title, Price, Copies are common instance variables and sale Copy is common method. The differences are, Book class has author and order Copies (). Magazine Class has methods orderQty, Current issue, receive issue (). Write a program to find how many copies of the given books are ordered and display total sale of publication.	Polymorphism -- CO3
3	Design and develop inheritance for a given case study, identify objects and relationships and implement inheritance wherever applicable. Employee class has Emp_name, Emp_id, Address, Mail_id, and Mobile_no as members. Inherit the classes: Programmer, Team Lead, Assistant Project Manager and Project Manager from employee class. Add Basic Pay (BP) as the member of all the inherited classes with 97% of BP as DA, 10 % of BP as HRA, 12% of BP as PF, 0.1% of BP for staff club fund. Generate pay slips for the employees with their gross and net salary.	Inheritance -- CO3
4	Design a base class shape with two double type values and member functions to input the data and compute_area () for calculating area of shape. Derive two classes: triangle and rectangle. Make compute_area () as abstract function and redefine this function in the derived class to suit their requirements. Write a program that accepts dimensions of triangle/rectangle and display calculated area. Implement dynamic binding for given case study.	Dynamic Binding -- CO3
5	Design and develop a context for given case study and implement an interface for Vehicles Consider the example of vehicles like bicycle, car and bike. All Vehicles have common functionalities such as Gear	Interface -- CO1, CO3

	Change, Speed up and apply breaks. Make an interface and put all these common functionalities. Bicycle, Bike, Car classes should be implemented for all these functionalities in their own class in their own way.	
6	Implement a program to handle Arithmetic exception, Array Index Out of Bounds. The user enters two numbers Num1 and Num2. The division of Num1 and Num2 is displayed. If Num1 and Num2 are not integers, the program would throw a Number Format Exception. If Num2 were zero, the program would throw an Arithmetic Exception. Display the exception.	Exception handling -- CO4
7	Implement a generic program using any collection class to count the number of elements in a collection that have a specific property such as even numbers, odd number, prime number and palindromes.	Template -- CO4
8	Implement a program for maintaining a database of student records using Files. Student has Student_id, name, Roll_no, Class, marks and address. Display the data for few students. 1. Create Database 2. Display Database 3. Delete Records 4. Update Record 5. Search Record	File Handling - CO5
9	Using concepts of Object-Oriented programming develop solution for any one application 1) Banking system having following operations : 1. Create an account 2. Deposit money 3. Withdraw money 4. Honor daily withdrawal limit 5. Check the balance 6. Display Account information. 2) Inventory management system having following operations : 1. List of all products 2. Display individual product information 3. Purchase 4. Shipping 5. Balance stock 6. Loss and Profit calculation.	Case Study -- CO2, CO5
10	Implement Factory design pattern for the given context. Consider Car building process, which requires many steps from allocating accessories to final makeup. These steps should be written as methods and should be called while creating an instance of a specific car type. Hatchback, Sedan, SUV could be the subclasses of Car class. Car class and its subclasses, CarFactory and Test Factory Pattern should be implemented.	Factory Design Pattern -- CO6
11	Implement and apply Strategy Design pattern for simple Shopping Cart where three payment strategies are used such as Credit Card, PayPal, Bit Coin. Create an interface for strategy pattern and give concrete implementation for payment.	Strategy Design Pattern -- CO6

Washik.

A linear address refers indirectly to a physical address by specifying a page table, a page within that table, and an offset within that page. The format of a linear address.

The addressing mechanism uses the DLR field as an index into the page directory, uses the PAGE field as an index into a page directory, uses the page field as an index into the page table determined by the page directory, and uses table offset field to address a byte within the page.

The physical address of the current page directory is stored in the CPU register CR3, also called the page directory base register (PDBR).

Memory management software has the option of using the page directory for all tasks, one page directory for each task, or some combination of the two. Refer to chapter 10 for information on initialization of CR3.

Q.3.

a) $\longrightarrow$

Two kinds of protection are related to pages.

- i) Restriction of addressable domain.
- ii) Type checking.

i) Restricting Addressable Domain:

The concept of privilege for pages is implemented by assigning each page to one of two levels.

i) supervisor level (U/S)=0 --- for the operating system and other systems software and related data.

ii) User-level (U/S)=1 --- for applications procedures and data.

The current level (U or S) is related to CPL. If CPL is 0, 1 or 2 the processor is executing at supervisor level. If CPL is 3, the processor is executing at user level.

1 when the processor is executing at supervisor level, all pages are addressable, but, when the processor is executing at user level, only pages that belong to the other user level are addressable.

b) →

Languages:

- Assembly language: Still widely used for microprocessor programming due to its low-level nature, allowing direct manipulation of hardware resources.

- C/C++: Commonly used to develop microcontroller and microprocessor programs offering a good balance between low-level control and high-level constructs.

- Python: Increasingly popular for microprocessor development, especially with platforms like Raspberry Pi where python libraries simplify hardware interfacing.

Development tools:

- Integrated development tools (IDE's): Software like Keil, MPLAB X, and Arduino IDE provide a comprehensive environment for writing, compiling, and debugging microprocessor code.

5/ ~~4~~ - Simulator/Emulators: Tools like ARMV, Proteus, and Virtual Box allow developers to simulate or emulate microprocessor behavior without physical hardware, aiding in debugging and testing.

Q5 a) →

Real mode	Virtual 80386 Mode
i) Limited to 1 MB.	ii) Simulated 8086 Environment
ii) Segmented with 16-bit Segment registers.	ii) Same as Real mode.
iii) Runs 8086 and 8088 software.	iii) Runs 8086 software in protected mode.
iv) Limited Security and multitasking.	iv) Benefits from protected mode features.
v) Direct access to physical memory.	v) Indirect access to physical memory.
vi) Offers no memory protection or privilege levels for protection.	vi) Offers lower privilege levels. In virtual 80386 mode the programs will run on 3rd ring of privilege level.

b) → It is a special type of segment, used to manage the task. The 80386 uses TSS like a scratch-pad. It stores everything it needs to know about a task in TSS. This means that task environment (context) is stored in the TSS.

TSS is not accessible to the general user program or program even at privilege level 0. Fields within TSS are accessible

to only 50386.

The field of a TSS are divided into two sets: Dynamic Set and static set.

Q.7

a) →

Interrupt Gate	Trap Gate
i) Called by the instruction INT.	ii) Trap Gate called by the instruction INT.
ii) Interrupt Gate stored in IDT.	ii) Trap Gate stored in IDT.
iii) A special feature is these gates all additional prohibit future interrupt acceptance.	iii) In trap Gate there are no features.
iv) Flexibility is more as compared to trap Gate.	iv) Flexibility is more as compared to Interrupt gate.
v) More portability options as compared to trap gate.	v) more portability options as compared to interrupt gate.
vi) Interrupt Gate is Hardware Interrupts.	vi) Trap Gate is Software Interrupts (Exceptions).
vii) It disables further interrupts.	vii) It does not disable further interrupts.

b) → Enabling and disabling interrupts in the Intel 80386 microprocessor architecture involves several key steps and considerations. First and foremost, it's essential to set up the Interrupt Descriptor Table (IDT), which serves as a map for handling various interrupt types and exceptions. Each entry in the IDT points to the location of the corresponding interrupt or exception handler code.

Once the IDT is configured, the next step is to control the interrupt flag (IF) bit in the FLAGS register. The IF bit determines whether interrupts are enabled or disabled. When the IF bit is set to 1, interrupts are enabled, allowing the processor to respond to external interrupt requests or software-generated interrupts triggered by instructions like `INT`.

To enable interrupts explicitly, developers use the `STI` (Set Interrupt Flag) assembly instruction, which sets the IF bit in the EFLAGS register to 1. This action informs the processor that it should handle incoming interrupts. Conversely, to disable interrupts, the `CLI` (Clear Interrupt Flag) assembly instruction is used to clear the IF bit, setting it to 0. This prevents the processor from responding to interrupts while the IF bit remains cleared.

Q.2)

a) Software-defined networking is a network architecture approach that enables the network to be intelligently and centrally controlled or 'programmed', using software applications.

- this model differs from that of traditional networks, which use dedicated hardware devices, (i.e. router, switch) to control network traffic. SDN can create and control a virtual network.

while network virtualization allows organization to segment different virtual networks within a single physical network, or to connect devices on different physical networks to create a single virtual network, software-defined networking enables a new way of

Q. 7

a

Python is considered as the scripting language and the java, C, C++.

are denoted as the high level programming

- One of the drivers behind SDN is a desire to transition from an old network design mindset to the new agile and more flexible so used in software development practice. When implementing software-defined networking in practice, flexibility are key concept.

6

Q. 2) VLAN-EVPN - VXLAN - NGRE
→

VXLAN, is defined as a network virtualization technology that enables to expansion of VLAN and solves the problem of virtual networks at large data centers. VXLAN makes use of VLAN-like encapsulation in order to encapsulate the layer 2 Ethernet frames then layer 2 UDP packets. at a single time, VLAN allows only up to 4096 network IDs. for large cloud computing environments, 4096 network IDs are not sufficient.

the packet format of VXLAN consist of a 24-bit ID segment. this 24-bit ID segment stands for 16 million virtual segments that are unique from each other.

NVGRE : NVGRE is defined as a network virtualization technique that makes use of encapsulation and tunneling to provide a large number of VCANs. NVGRE provides subnets with VCAN that provide multi-tenant and load-balanced networks to be shared on the cloud environments.

NVGRE solves the problem that is caused by the limited number of VCANs.

- NVGRE is not compatible with traditional load balancing.

- NVGRE is used for flexible way of transmission.

- NVGRE has a lower 24-bit of GRE header than TNL.

- Microsoft, HP, and Arista are the vendors of NVGRE.

7

Q. 4

a) →

A northbound interface is an application programming interface or protocol that allows a lower-level network component to communicate with a higher-level or more central component; while -- conversely

the northbound interface is SDN is the communication between the highest application layer and the SDN Controller at the middle control layer.

the application layer consist of network orchestration services, networking designer software, operator software or third-party applications that makes decision about the overall structure of the network.

"northbound" refers to heading toward the North.

8

b) Composition of SDN.

→

A typical representation of SDN architecture comprises three layers.

- 1) application layer
- 2) control layer
- 3) infrastructure layer.

- 1) Application layer: It contains the typical network applications like intrusion detection, firewall and load-balancing.

2) Control layer - It consists of the SDN controller which acts as the brain of the network. It also allows hardware abstraction to the applications written on top of it.

3) Infrastructure layer - this consists of physical switches which form the data plane and carries out the actual movement of data packets.

Q.5)

9)

→ NNF (Network function virtualization)

Network functions virtualization is the replacement of network appliance hardware with virtual machines. The virtual machines use a hypervisor to run network working software and processes such as routing and load balancing.

- network functions is the machine use a hypervisor to run network.
- Virtual networking enables the communication between multiple computers, virtual machines (vms), virtual servers, or other devices across different office and data center location.
- NNF is a network architecture concept that leverage IT virtualization technologies to virtualize entire classes of network node functions into building blocks that may connect or chain together to create and deliver communication services.

9

Q.5

b)

SDN

NFV

1) SDN architecture mainly focuses on data centers.

NFV is targeted at service providers or operators.

2) SDN uses OpenFlow as a communication protocol.

There is no protocol determined yet for NFV.

3) SDN supports open-networking foundation

NFV is driven by ETSI NFV working group.

4) SDN applications run on industry-standard servers or switches

NFV applications run on industry-standard servers.

5) ~~Redefine Network architecture~~

Redefines network equipment architectures.

6) Uses API Driven forwarding Rules

Uses orchestration for network functions.

7) Protocol OpenFlow

doesn't support OpenFlow

8) Application of:
SDN networking,
cloud
orchestration

Routers, firewalls,
gateways, WAN
- SLA assurance,
- wide serving

Q.7)

a) South bound application Interface:

Software-defined southbound application program interfaces are used to communicate between the SDN Controller and the switches and routers of the network.

- The SDN is the communication betⁿ the SDN Controller at the middle control layer and the lower networking elements at the data layer.

- The SDN controller takes the desired state of the network and translate it into specific commands and configuration that are turn to the network devices over the southbound interface.

- Southbound APIs allows the end-user to gain better control over the network and promotes the efficiency level of the SDN controller to based on real-time demands and needs.

- Some of the popular southbound APIs are openflow, Cisco, and Open flex and other switch and router vendors that support openflow

MANAGEMENT & RESEARCH, NASHIK.**

Department of Computer Engineering

Savitribai Phule Pune University

3. Undertaking by Students

With reference to circular (ref-project/2009/3369) regarding malpractices in project work from DTE, Pune following undertaking is to be submitted.

UNDERTAKING BY STUDENT

We, the students of B.E. Computer hereby assure that we will follow all the rules and regulations related to project activity for the academic year 2023-2024. The Project titled

Coupon Code Exchange Platform

will be fully designed/ developed by us and every part of the project will be original work and will not be copied/ purchased from any source.

Name of the student

4. Schedule of Project Work

Semester I

Sr. No.	Activity Scheduled	Date (Tentative)
1.	Registration of Project Teams	Third Year Semester II/ Mid of June
2.	Submission of Project Proposal	Last Week of June
3.	Project presentations	First week of July
4.	Finalization of projects & allotment of guide	Second week of July
5.	Submission of final Proposal	Third week of July
6.	Review meeting/ presentation for progress of project work- I	Last week of July
7.	Review meeting/ presentation for progress of project work- II	Third week of August
8.	Review meeting/ presentation for progress of project work- III	Second week of Sept
9.	Review meeting/ presentation for progress of project work- IV	Last week of Sept
10.	Submission of partial project report	1 st Week Oct
11.	Project work (Stage I) Examination	As per SPPU Notification

Semester II

Sr. No.	Activity Scheduled	Date(Tentative)
1.	Review meeting/ presentation for progress of project work -V	Second week of Jan
2.	Review meeting/ presentation for progress of project work -VI	Second week of Feb
3.	Review meeting/ presentation for progress of project work- VII	Last week of March
4.	Submission of final project report and Project Work book to the project Coordinator	First week of April
5.	Project Examination	As per SPPU Notification

5. Project Review (Semester I)

The group members are expected to present their work undertaken during the semester. Journey of development has to be rationally presented with thorough literature survey in review meeting.

5.1 Project Review-I: Problem Statement, Motivation, objectives and Literature Review

Student is expected to deliver presentation covering Problem Statement, Motivation, objectives and Literature Review.

Sr. No.	Question	Date	Remark / Grade	Sign of Guide
1)	Do Research gap identified lead to find motivation of project?	10/7/23	A+	
2)	Does the statement give clear identification about what your project will accomplish?	10/7/23	A	
3)	Is the statement short and concise?	14/7	A	
4)	Do similar type of methodology / model exists?	14/7	A+	
5)	Is the studied literature sufficient to decide scope of the project?	14/7	A+	
6)	Are the objectives clearly and unambiguously listed?	14/7	A+	
7)	Can a person who is not familiar with the project understand scope of the project by reading the project problem statement?	17/7	A+	
8)	Are project objectives of study (what product, process, resource etc.) clearly defined?	17/7	A+	
9)	Are the objectives set helpful to achieve goal of the project?	17/7	A+	
10)	Does the project contribute to our society by any means?	17/7	A+	

Remark and Suggestions:

Name and Sign of

Reviewers: 1. G.P. Mohole

5. Project Review (Semester I)

The group members are expected to present their work undertaken during the semester. Journey of development has to be rationally presented with thorough literature survey in review meeting.

5.1 Project Review-I: Problem Statement, Motivation, objectives and Literature Review

Student is expected to deliver presentation covering Problem Statement, Motivation, objectives and Literature Review.

Sr. No.	Question	Date	Remark / Grade	Sign of Guide
1)	Do Research gap identified lead to find motivation of project?	10/7/23	A+	
2)	Does the statement give clear identification about what your project will accomplish?	10/7/23	A	
3)	Is the statement short and concise?	14/7	A	
4)	Do similar type of methodology / model exists?	14/7	A+	
5)	Is the studied literature sufficient to decide scope of the project?	14/7	A+	
6)	Are the objectives clearly and unambiguously listed?	14/7	A+	
7)	Can a person who is not familiar with the project understand scope of the project by reading the project problem statement?	17/7	A+	
8)	Are project objectives of study (what product, process, resource etc.) clearly defined?	17/7	A+	
9)	Are the objectives set helpful to achieve goal of the project?	17/7	A+	
10)	Does the project contribute to our society by any means?	17/7	A+	
Remark and Suggestions:				

Name and Sign of

Reviewers: 1. G. P. Mohole

2. S. N. Botekar

5.2 Project Review-II: Feasibility and Scope

Student is expected to deliver presentation covering Feasibility and Scope

Sr. No.	Question	Date	Remark / Grade	Sign of Guide
1)	Is the project's view point understood?	17/7/23	A+	
2)	Is the project goal statement in alignment with the sponsoring organization's business goal and mission?	17/7/23	A	
3)	Who is the project's end user?	21/7/23	A+	
4)	What is the projected cost of producing a product?	21/7/23	A+	
5)	Is project achievable in specified (Time, Cost Budget)?	21/7/23	A	
6)	Are the requirements within the scope of the project?	21/7/23	A+	
7)	Is the scope properly defined?	24/7/23	A	
8)	Does the problem statement clearly define scope of the project?	24/7/23	A+	
9)	Do the project requirements fit into available software and hardware?	24/7/23	A+	
10)	Whether the milestones are stated completely and project timeline is given?	24/7/23	A+	
11)	Whether risks like technical risks, Operational risks, schedule risks, business risks are identified correctly or not?	24/7/23	A+	
12)	Whether Risk prioritization is done properly and any back up plan is decided?	28/7/23	A+	

Remark and Suggestions:

Name and Sign of

Reviewers: 1. G.P. Mohole

2. S.H. Botekar

5.3 Project Review-III: Requirement Analysis

Student is expected to deliver presentation covering Requirement Analysis

Sr. No.	Question	Date	Remark / Grade	Sign of Guide
1)	Is information domain analysis complete, consistent and accurate?	28/7/23	A	
2)	Is problem statement categorized in identified area and targeted towards specific area there in?	31/7	A+	
3)	Is external and internal interfacing properly defined?	31/7	A	
4)	Are requirements consistent with schedule, resources and budget?	31/7	A+	
5)	Are all requirements traceable to system level?	31/7	A	
6)	What is needed to make the product?	4/8	A+	
7)	Is there a demand for the product?	4/8	A	
8)	Is identification of stakeholders done properly?	4/8	A+	
9)	Whether all requirements are captured and documented in line with scope?	4/8	A	
10)	Whether all type of analysis classes are identified?	7/8	A+	
11)	Whether the Acceptance criteria is decided	7/8	A	
12)	Is SRS document as per IEEE format complete and correct?	7/8	A	
Remark and Suggestions:				

Name and Sign of

Reviewers: 1.

2.

5.4 Project Review-IV: Design

Student is expected to deliver presentation covering Design

Sr. No.	Question	Date	Remark / Grade	Sign of Guide
1)	Are requirements reflected in the system architecture?	11/8	A	
2)	Does the design support both project (product) and project goals?	11/8	A+	
3)	Does the design address all the issues from the requirement?	11/8	A	
4)	Is effective modularity achieved and modules are functionally independent?	11/8	A	
5)	Are structural diagrams (class, Object, etc) well defined?	11/8	A+	
6)	Are all class associations clearly defined and understood?(Is it clear which classes provide which services)?	14/8	A	
7)	Are the classes in the class diagram clear? (What they represent in the architecture design document?)	14/8	A	
8)	Is inheritance appropriately used?	14/8	A	
9)	Are the multiplicities in the use case diagram depicted in the class diagram?	14/8	A+	
10)	Are all objects used in sequence diagram?	14/8	A	
11)	Are the symbols used in all diagrams corresponding to UML standards?	14/8	A+	
12)	Are behavioral diagrams (use case, sequence, activity, etc.) well defined and understood?	13/8	A	
13)	Does each case have clearly defined actors and input/ output?	18/8	A	
14)	Does the sequence diagram match with class diagram?	18/8	A	
15)	Is aggregation/ containment (used) clearly defined and understood?	18/8	A+	
16)	Whether State charts are capturing system's dynamic behavior correctly?	21/8	A	
17)	Related to procedural thinking whether DFDs and CFDs along with transaction and transformation flow are done correctly?	21/8	A

7. Project Review: (Semester II)

The group members are expected to present their work undertaken during the semester. Journey of development has to be rationally presented.

7.1 Project Review-I: Modeling (Model Refinement and Algorithm development)

Student is expected to deliver presentation covering Modeling

Sr. No.	Question	Date	Remark/ Grade	Sign of Guide
1)	Which software Development Process model is used? (Water fall, Incremental, RAD) How? (at this level?)	5/1/24	A+	
2)	Are data objects, their attributes and relationships clearly identified? (All constraints for SRS are captured or not?)	5/1/24	A++	
3)	Have the objects and respective classes and their responsibilities?	5/1/24	A+	
4)	Have you analyzed the requirements been analyzed and represented into respective models?	5/1/24	A	
5)	Have the different system states been differentiated and depicted them in the form of state transition diagram?	5/1/24	A++	
6)	Does the mathematical model clearly imply design of the project?	5/1/24	A++	
7)	Does the mathematical model clearly states goal of project?	5/1/24	A	
8)	Is the interface between the modules properly identified?	5/1/24	A+	
9)	Are any functional dependencies identified and described?	5/1/24	A	
10)	Which architectural model does the system support?	5/1/24	A+	
11)	Whether Deployment diagram is in line with selected architecture?	5/1/24	A+	
12)	Whether all components are designed properly and represented in component diagram?	5/1/24	A	
13)	Whether NP-completeness of algorithms is checked?	5/1/24	A+

3	2	1	What are the various types of constructors in JAVA? Explain with example.	5	Explanation : 5
3	2	2	What is destructor? What is the purpose of using a destructor in C++? Explain with example.	5	Explanation : 5
3	2	3	Write a short note on 'Copy Constructor' in JAVA?	5	Explanation : 5

Assignment No. : 3

Q1. What are the various type's of Construction in JAVA? Explain with example.

Ans: There are Three type's of Constructor For now!

- ① Default Constructor
- ② Parameterized Constructor
- ③ Copy Constructor

A] Default Constructor:

A default Constructor is automatically provided by the Java Compiler if a class does not explicitly define any Constructor.

Example:

```
Public class car {  
    String make;  
    int year;  
}
```

B] Parameterized Constructor:

A parameterized Constructor is defined with one or more parameter, allowing you to initialize object properties with specific value during object creation.

Example:

```
Public class person {  
    String name;  
    int age;  
    Public person(String name, int age) {  
        this.name = name;  
        this.age = age;  
    }  
}
```

③ Copy Constructor:

A Copy Constructor is used to create a new object as a copy of an existing object of the same class. It takes an object of the same class as a parameter and copies its properties.

Example:

```
public class point {  
    int x;  
    int y;  
    public point(point other) {  
        this.x = other.x;  
        this.y = other.y;  
    }  
}
```

Q2 What is destructor? What is the purpose of using a destructor in C++? Explain with example

Ans: Destructor:

- A Destructor is used to destroy the memory allocated by the constructor.
- It is used to release resource held by an object such as freeing dynamically allocated memory, closing files, releasing network connection or other cleanup tasks.
- It is used to perform custom cleanup and finalization action that are specific to the class.

example:

```
#include <iostream>
class ResourceHolder {
public:
    ResourceHolder(int resourceId): id(resourceId)
    {
        std::cout << "ResourceHolder object created  
with ID: " << id << std::endl;
    }
    ~ResourceHolder() {
        std::cout << "ResourceHolder object  
destroyed releasing resource with ID  
<< id << std::endl;
    }
private:
    int id;
};

int main() {
    ResourceHolder resource1(123);
    ResourceHolder resource2(456);
    return 0;
}
```

Q3

Write a short note on 'Copy Constructor' in Java?

Ans: A parameterized Constructor to which the parameter passed is an object is called as copy constructor. The parameter of the Object passed to the Constructor are used to initialize the parameter's of the new created object, hence the name 'copy'.

Example:

```
import java.util.*;
class Circle
{
    Private float r area;
    Circle ()
    {
        Scanner Sc = new Scanner (System.in);
        System.out.print ("Enter Radius");
        r = Sc.next float ();
    }
    Circle (circle x)
    {
        r = x.r;
    }
    void calculated ()
    {
        area = 3.14 f * r * r;
    }
    void display ()
    {
        System.out.println ("Area = " + area);
    }
}
```

```
Circle C = new circle ();  
C. calculate();  
C. display();  
Circle C1 = new circle(C);  
C1. calculate();  
C1. display();  
}  
}
```

03	03	03	09	<i>[Signature]</i>

Assignment No.:	2	
Title:	persond Information system using constructor, destructor, static...	
Roll No.:	32	Batch: S 2
Class:	S.E. / T. E. / B.E	
Date:	7/9/23	
Subject:	OOP	

Co1: understand and apply the concepts like inheritance, polymorphism, exception handling and generic structures for implementing codes.

Practical No: 02

Title : personal information system using constructor, destructor, static member functions, Friend class, this pointer, inline code and dynamic memory allocation

objectives : To learn the concept of constructor, copy constructor, static member functions, Friend class, this pointer, inline code and dynamic memory allocation operators - new and delete.

problem Statement : Develop an object oriented program in C++ to create a database of student information system containing the following information: Name, Roll Number, class, division, Date of Birth, Blood group, Contact address, telephone number, driving licence no. etc. Construct the database with suitable member functions for initializing and destroying the data viz Constructor, default Constructor, Copy Constructor, destructor, static member functions, Friend class, this pointer, inline code and dynamic memory

allocation operators - new and delete

outcomes: We learn the concept of constructor, default constructor, copy constructor, destructor, static member functions, friend class, pointer, inline code and dynamic memory allocation operators - new and delete

Software Requirements: 64-bit open source Linux or its derivative, open source programming tool like G++ / GCC

Hardware Requirements: pentium IV, 512

Theory - Concepts:

Constructor: A special method of the class that will be automatically invoked when an instance of the class is created. It is called as constructor. Following are the most useful features of constructor.

Constructor is used for initializing the values to the data members of the class. Its name is same as the name of the class.

When an object of class is created, the constructor gets automatically called.

• constructor never have a Return type even void.

constructor can be classified into 3 types.

i.) Default Constructor

ii.) Parameterized constructor

iii.) Copy constructor

i.) Default constructor: default constructor is also called as Empty constructor which has no arguments and it is automatically called when we create the object of class but remember name of constructor is same as name of class and constructor never declared with the help of Return type.

ii.) Parameterized constructor: this is another type constructor which has ~~some~~ arguments and same name as class name but it uses some arguments. So for this we have to create object of class by passing some arguments to the constructor then this will automatically pass the arguments to the constructor and the values will retrieve by the respective data members of the class.

Copy Constructor :

This is also another type of constructor. In this constructor we pass the object of class into the another object of same class. As name suggests copy, means copy the values of object into the another object.

Destructor : As we know that constructor is that which is used for Assign some values to data Member and for Assigning some values this may also used some memory so that to free up to memory which is allocated by constructor, destructor is used which gets automatically called at the end of program and we doesn't have to explicitly call a destructor. copy constructor can be parameterized means ~~Default~~ which have to Argue.

Static members

A class can contain static members either data or functions.

A static member variable has following properties:

- It is initialized to zero when the first object of its class is created. No other initialization is permitted.
 - only one copy of that member is created for the entire class and is shared by all the objects of that class.
 - It is visible only within the class but its lifetime is the entire program.
- Static data members of a class are also known as "class variables", because there is only one unique value for all the objects of that same class. Their content is not different from one object. Static members have the same properties as global variables but they enjoy class scope. For that reason, and to avoid them to be declared several times, we can only include the prototype in the class declaration but not its definition.

- A static member function has following properties:

Algorithm :

1. start
2. Read personnel information such as Name, Roll number, class, division, Date of Birth, Blood group, contact address, telephone number, driving licence no. etc.
3. print all information from database.
4. stop

Input

personnel information such as Name, Roll number, class, division, Date of Birth, Blood group, contact address, telephone number, driving licence no. etc.

output : Display personnel information from database.

conclusions:

Hence, we have successfully studied (or) of constructor, default constructor, copy constructor, destructor, static member functions, friend class, this pointer, inline code and dynamic memory allocation operators - new and delete.

Project Title : Weather Forecast Application

Name of Mentor: Mrs J.P. Patil

Preamble

Project Based Learning (PBL) is an instructional approach that emphasizes critical-thinking, collaboration and personalized learning. In PBL, student groups engage in meaningful inquiry that is of personal interest to them. These projects are based on problems, which are real-life oriented, curriculum-based and often interdisciplinary. Students decide how to approach a problem and what activities or processes they will perform. They collect information from a variety of sources, analyze, synthesize and derive understanding from it. The real-world focus of PBL activities is central to the process because it motivates students and adds value to their work. Their learning is connected to something real and involves life skills such as collaboration and reflection. The faculty assigned to the group is referred as mentor. Technology enables students and Mentor in various phases of the PBL process. At the end of the PBL, students demonstrate their newly acquired knowledge and are evaluated by how much they have learned and how well they communicate it. Students also conduct self-evaluation to assess their own growth and learning. Throughout this process, the mentor's role is to guide and advise students, rather than to direct and manage student work.

CERTIFICATE

This is to certify that Mr./ Ms. Tiksha Lalit Yeole

Group No. PBL-12 Division _____ Branch Information T. has successfully

completed the work associated with **Project Based Learning (214458)** titled as-

Weather forecast Application

and has submitted the work book associated under my supervision, in the partial fulfillment of Second Year

Bachelor of Engineering (2019 course) of Savitribai Phule Pune University.

Date: 29/4/24

Place: Nashik

Table of Contents

Sr. No.	Description	Page No.
	Preamble	i
1.	Project Based Learning Syllabus	1
2.	Recommended Guidelines and Phases	4
3.	Evaluation and Continuous Assessment Sheet	5
4.	Project Information Sheet	6
5.	Assessment Remarks Sheet	7
6.	Project Monitoring (1 sheet per week)	9 onwards

1. Project Based Learning Syllabus:

Savitribai Phule Pune University, Pune Second Year Information Technology (2019 Course)

214458: Project Based Learning

Teaching Scheme:

Practical (PR): 04hrs/week

Credit Scheme:

02

Examination Scheme:

TW : 50 Marks

Course Objectives :

- To learn the various processes involved in project based learning.
- To develop critical thinking and engineering problem solving skills amongst the students.
- To explain the roles and responsibilities of IT engineers to the solution of engineering Problems within the social, environmental and economic context.
- To equip the students with knowledge and skills require to develop solutions for the Problems coming from various Hackathon.

Course Outcomes :

- **CO1 :** Design solution to real life problems and analyze its concerns through shared cognition.
- **CO2 :** Apply learning by doing approach in PBL to promote lifelong learning.
- **CO3 :** Tackle technical challenges for solving real world problems with team efforts.
- **CO4:** Collaborate and engage in multi-disciplinary learning environments

Group Structure :

Group structure should enable students to work in mentor-monitored groups. The students plan, manage and complete a task/project / activity which address the stated problem.

1. There should be a team of 3 to 6 students who will work cohesively.
2. A Mentor should be assigned to individual groups who will help them with learning and development process

Selection of Project/Problem :

1. The project scope/topic can be from any field/area, but selection related to IT technical aspect is desirable.
2. The project/problem done in first year engineering could be extended further, based on its potential and significance analysis.
3. Project/problem requiring solutions through conceptual model development and use of software tools should be preferred.
4. Different alternate approaches such as theoretical, practical, working model, demonstration or software analysis should be used in solving/implementing of project/problem.
5. The project/problem requiring multi-disciplinary approach to solve it, should be preferred.
6. Problem may require in depth study of specific practical, scientific or technical domain.
7. Hands-on activities, organizational and field visits, interacting with research institutes and expert consultation should be included in the approach to make students aware of latest technologies.

Assessment:

The department should be committed to assess and evaluate both student performance and solution impact. Progress of PBL will be monitored regularly on weekly basis. Weekly review of the work is necessary. During process of monitoring and continuous assessment and evaluation the individual and team performance is to be measured by mentor. Students must maintain an institutional culture of authentic collaboration, self- motivation, peerlearning and personal responsiveness. The institution/department should support students in this regard through guidance/orientation programs and the provision of appropriate resources and services. Supervisor/mentor and students must actively participate in assessment and evaluation processes. Group may demonstrate their knowledge and skills by developing a public product and/or report and/or presentation.

1. Individual assessment for each student (Understanding individual capacity, role and involvement in the project).
2. Group assessment (roles defined, distribution of work, intra-team communication and togetherness).
3. Documentation and presentation.

Evaluation and Continuous Assessment:

It is recommended that all activities are to be recorded in PBL workbook, regular assessment of work to be done and proper documents are to be maintained at college end by both students as well as mentor. The PBL workbook will reflect accountability, punctuality, technical writing ability and work flow of the task undertaken. Continuous Assessment Sheet (CAS) is to be maintained by all mentors/department. Recommended parameters for assessment, evaluation and weightage:

1. Idea Inception (5%)
2. Outcomes of PBL/Problem Solving Skills/Solution provided/Final product(40%) (Individual assessment and team assessment)
3. Documentation (Gathering requirements, design & modeling, implementation/execution, use of technology and final report, other documents (25 %))
4. Potential for the patent(10%)
5. Demonstration (Presentation, User Interface, Usability etc.) (10%)
6. Contest Participation/ publication (5%)
7. Awareness/Consideration of Environment/ Social /Ethics/ Safety measures/Legal aspects (5%).

Design the rubrics based on the above parameters for evaluation of student performance

Note:

- While planning for the assessment, **choose a valid method based on your context**. It should be able to understand by both the students as well as the faculty.
- The student group must **follow the principles of Software Engineering** (Scoping out the problem, the solution implementation and related documentation).
- If the implementation code is well documented, the project can be continued by subsequent batch – which will help solve a bigger problem.

Reference Books :

1. Project-Based Learning, Edutopia, March 14,2016.
2. What is PBL? Buck Institute for Education.
3. www.schoolology.com
4. www.wikipedia.org 5. www.howstuffworks.com

2 Recommended Guidelines and Phases:

PBL is learning through activity. One of the teachers can be appointed as coordinator for PBL. Following are the recommended guidelines that will work as an initiator and facilitator in process of completion of PBL.

1. In first week of commencement of 2nd semester or preferably at the end of first semester let the coordinator create awareness about PBL(what, why, and how) among the students. Convey students expected outcomes, assessment process and evaluation criteria.
2. Get groups of students registered preferably 4-6 students per group.
3. Assign mentor to each group.
4. Provide guidelines for title identification (Problem can be some real life situation that needs technology solutions. This situation can be identified by meeting people around, visiting various industries, society, and institutes. The solution can be prototype, model, convertible solutions, survey and analysis, simulation, and similar).
5. Let students submit the problem identified in prescribed format(Title, Problem statement, details of a problem undertaken, and what is need of solution to the problem)
6. Coordinator and mentor can approve the problem statements based on feasibility and learning outcomes expected for first year engineering students
7. Mentor is to monitor progress of the task during phases of project work. Broadly phases may include- requirements gathering, preparing a solution, technology design for the solution. (optional phases- implementation and testing)
8. Weekly monitoring and continuous assessment record is to be maintained by mentor.
9. Get the report submitted at the end of semester.

3. Evaluation and Assessment Sheet (To be filled in my mentor)

Sr. No.	Details	Maximum Marks	Marks Obtained
1.	Problem Identification (Idea Inception)	2.5	02
2.	Problem Analysis (Requirement Gathering)	12.5	10
3.	Proposed Solution Model/Design/ Process / prototype	05	14

Continuous Assessment and Remarks Sheet (To be filled in by mentor)

Problem Identification (Idea Inception) – Current weather apps simplicity & speed making challenging for users quickly access accurate information for specific cities. There is a need for streamlined web application that prioritizes user-friendly interfaces, delivering real-time.

Problem Analysis (Requirement Gathering) – Gathering requirement for a weather forecast app involves understanding needs and expectations of various stakeholders, including users, developers, other relevant parties.

Proposed Solution Model/Design/ Process / prototype – Proposed web model for weather forecast app should address.

- i) User Interface & Experience (UI/UX)
- ii) Core features
- iii) Additional features

Technology Solution Model– Technology web model for weather forecast app involves selecting appropriate technologies architectural components to implement desired features functionalities effectively

Expected Outcomes– Expected outcomes for weather forecast app:-
i) Accurate weather predictions
ii) Timely Notifications
iii) Enhanced user experience
iv) Increased safety and preparedness.

Implementation and Testing– Implementation of weather forecast app involves several stage.

- i) Development Environment setup
- ii) Backend Development
- iii) Frontend Development
- iv) Integration, Testing
- v) Feature Development
- vi) user acceptance testing
- vii) Quality Assurance
- viii) Performance optimization

Regularity (Attendance + Weekly Progress Reporting) - Regularity of weather forecast app is crucial for maintaining the reliability and usefulness of a weather forecast app.

Awareness /Consideration of -Environment/ Social /Ethics/ Safety measures/Legal aspects-

Creating awareness for weather forecast app involves effectively promoting its features, benefits and value-proposition to target audience.

i) Target marketing campaign ii) Digital marketing.

Contest Participation/ publication-

Participation in contest can be an effective way to promote weather forecast app. gain visibility & potentially with recognition or rewards.

Report - At the final stage soft copy of report of weather forecast app was made & verification the tutor.

Project Monitoring/ Progress Information Sheets

	Current Phase:	Date	Discussion	Progress Till Date	Remark If Any	Signature
Week	Group Formation	19/11/24	During week 1 of planning phase, discussion focused define project scope, objective, identify group members.	Identified stakeholder, communication channels. Defined scope objective and requirements.	29/11/24	
Week	Topic Finalization	29/11/24	During week 2 analysis phase, discussion around gathering analyzing user requirement conducting feasibility study creating system requirements.	Gathered & analyzed user requirements. Conducted feasibility study to assess technical economic organizational aspects.	12/12/24	
Week	Literature Review	12/12/24	During week 3 design phase focused on developing system architecture interface.	Development architecture including hardware software components.	14/13/24	
Week	Workflow Diagram	14/13/24	During week 4 development focused on coding core functionalities based on design specification.	Coding core based on specification writing code module & implements Group to ensure standard version.	5/4/24	

Week	Mid Term Status	5/4/24	In week, development centered testing engineering group member conducted rigorous testing of individuals.	Conducting testing for individual functionality optimizing performance and scalability	16/4/24	
Week	Weekly Progress and Guidance	16/4/24	During week 6 development phase discussion focused on development planning environmental user testing	completed user guide, development documentation prepared for analyzing support post-development	15/4/24	
Week	Presentation and Competition	15/4/24	During week 7 discussion focused on finalizing documentation for software project	Finalized report, workbook completed finally change certifying all documentation	15/4/24

TUTOR REPORT

Department of Computer Engineering
Student ID: _____ Class: _____
Name Of Tutor: Prof. D. D. Jagtap / Mrs. Chitra Jagtap

PERSONAL DEATAIL:-

Name of Student	<u>Bhadange</u>	<u>Aditi</u>	<u>Anna</u>
Fathers Name	<u>Bhadange</u>	<u>Anna</u>	<u>Maruti</u>
Mothers Name	<u>Bhadange</u>	<u>Vaishali</u>	<u>Anna</u>
Post & Name of Organization	<u>Service</u>	<u>Housewife</u>	
Legal Guardian's (if any) name, Contact No.			

Date of Birth (DD/MM/Year): 06/10/2004 Blood group: B+ Religion: Hindu

Category (Open/OBC/SC/ST/NT): NT-D Caste: Vanjari Sub caste: _____

Admission Quota (CAP/Management/TFWS): CAP Aadhar Card No.: 273849666765

Student's Contact No. 9423309674 Father's Contact No. 9850059340

Mother's Contact No. 7387309340 Landline _____

Student's Email ID: aditibhadange610@gmail.com

Correspondence Address: 3, New sadguru row-houses, vday colony, cidco, New Nashik.

Permanent Address: 3, New sadguru row-houses, vday colony, cidco, New Nashik.

Participation in Extra Curricular Activities (Such as Sports, Cultural, Social, Academic Etc.)

<u>participitated in cultural event-dance</u>
<u>participitated in sports like carrom, in Jitoustav</u>
