- **Objective of the Expert Talk :**

The objective of the expert talk was to equip students with effective problem-solving and critical thinking skills, enabling them to analyze complex problems, generate creative solutions, and make informed decisions.

- **Summary of the Talk:**

The speaker began by emphasizing the importance of problem-solving and critical thinking skills in today's fast-paced and ever-changing world. The speaker highlighted that these skills are essential for personal and professional growth, enabling individuals to adapt to new situations, innovate, and make informed decisions.

The speaker then discussed the key principles of problem-solving and critical thinking, including:

1. **Defining the problem:** Clearly articulating the problem and identifying the key issues.

2. **Gathering information:** Collecting relevant data and facts to inform the problem-solving process.
3. Analyzing the data: Evaluating the information and identifying patterns, relationships, and insights.

4. Generating solutions: Developing a range of potential solutions and evaluating their feasibility and effectiveness.

5. Implementing and evaluating: Selecting the best solution, implementing it, and assessing its impact.

The speaker also shared practical strategies for developing problem-solving and critical thinking skills, including:

1. Practice active listening: Paying attention to others, asking questions, and clarifying assumptions.

2. Ask open-ended questions: Encouraging critical thinking and exploration of ideas.

3. Encourage diverse perspectives: Seeking input from people with different backgrounds, experiences, and expertise.

4. Embrace failure: Viewing failure as an opportunity to learn and improve.

- **Key Takeaways:**

    1. Problem-solving and critical thinking skills are essential for personal and professional growth.

    2. Effective problem-solving involves defining the problem, gathering information, analyzing the data, generating solutions, and implementing and evaluating.

    3. Practical strategies for developing problem-solving and critical thinking skills include active listening, asking open-ended questions, encouraging diverse perspectives, and embracing failure.

- **Conclusion:**

The expert talk on "Problem Solving and Critical Thinking" was a resounding success, providing attendees with valuable insights, practical strategies, and a renewed appreciation for the importance of these skills. We look forward to hosting more expert talks and providing opportunities for students to develop their problem-solving and critical thinking skills.

Subject: - Permission regarding conduction of expert lecture on **"Python Programming Language"**

Respected Sir,

We are writing this letter to request permission to conduct expert lecture on **"Python Programming Language"** for all SE and BE Civil Engineering Students of Jawahar Education Society's, Institute of Technology, Management and Research, Nashik on **23rd January 2024** in **AutoCAD Lab.**

This session aims to introduce students to the fundamentals of Python programming and its applications in civil engineering. We believe that this lecture will greatly benefit our academic growth and provide us with valuable insights into the industry. We assure you that the lecture will be conducted in an orderly and professional manner, without causing any disruption to the regular academic activities.

We will be highly thankful to you, if you can allow this training.

Thanking You.

Respected Sir,

Jawahar Education Society's, Institute of Technology, Management and Research, Nashik is providing Bachelor's Degree in Engineering viz. Civil, Mechanical, Electrical, Computer, Information Technology and Artificial Intelligence and Data Science. Hereby, Civil Engineering Department has planned to organize expert lecture on **"Python Programming Language"** on **23rd January 2024** in **AutoCAD Lab** for all SE and BE Civil Engineering Students.

We would like to invite you as an expert to conduct such expert lecture.

Thanking You.

Notice

Date: - 02/01/2024

All the students of **SE and BE Civil Engineering** are hereby informed that department has organized expert lecture on **"Python Programming Language" on 23rd January 2024** in **AutoCAD Lab.**

This lecture aims to introduce students to the fundamentals of Python programming and its applications in civil engineering. You will learn about the basics of Python, data structures, file handling, and more. This is a great opportunity to learn from an industry expert and enhance your programming skills.

Please note that attendance is mandatory for all SE and BE Civil Engineering students.

Event Report

• **Day & Date**	:-	**Tuesday, 23/01/2024**
• **Name Event**	:-	Expert lecture on **"Python Programming Language"**
• **Organized by**	:-	Department of Civil Engineering, Jawahar Education Society's, Institute of Technology, Management & Research, Nashik.
• **Coordinator**	:-	Mr. S. L. Desale, Assistant Professor, Department of Civil Engineering
• **Invited Guest**	:-	**Mr. S. B. Patil,** Assistant Professor, Department of Information Technology
• **Venue**	:-	AutoCAD Lab
• **Participants**	:-	SE and BE Civil Engineering Students
• **No. of Participants**	:-	SE Civil :- 13 BE Civil:- 14 **Total :- 27**

- **Objective of the Event**:-

This course aims at providing an opportunity for students to enrich their knowledge and skill in developing various solutions for solving engineering problems in the society.

This Python Programming leads students from the basics of writing and running Python scripts to more advanced features such as file operations, regular expressions, working with binary data, and using the extensive functionality of Python modules. Extra emphasis is placed on features unique to Python, such as tuples, array slices, and output formatting.

- **Outcome of the Event**: -

The department of Civil Engineering has organized a Expert lecture on **"Python Programming Language"** on **23rd January 2024**. The Resource person is Mr. S. B. Patil, Assistant Professor,

Department of Information Technology, Jawahar Education Society's, Institute of Technology, Management & Research, Nashik. Se and BE students from the department of Civil Engineering had attended this Lecture. Total of 27 students attended to this session.

In this session resource person covered the syllabus which was related to Computer Programming in Civil Engineering. To begin with, the various Programming languages and their advantages were discussed, Mr. S. B. Patil emphasized that, in addition to learning the academic curriculum, students should attempt to learn the latest programing languages which are trending in the IT industry.

Subsequently, Mr. S. B. Patil shared information on the Python Programming Language and its scope. He described the difference between Python and other Programming Languages. He also explained the students on how to get started with Python and define functions, library files available etc. Later on he discussed some basics which were related to PYTHON programming with respect to syllabus and real time applications. Explaining about Data Types in Python Python is a high-level, general-purpose and a very popular programming language. Python programming language (latest Python 3) is being used in web development, Machine Learning applications, along with all cutting edge technology in Software Industry. Python Programming Language is very well suited for Beginners, also for experienced programmers with other programming languages like C++ and Java. The session was extremely interesting for the students and they got an opportunity to hear and learn

Graphics Primitives

- Computer graphics primitives are basic geometric shapes or elements that serve as the building blocks for creating more complex images in computer graphics.
- Some common computer graphics primitives include:
- **Points:** These are single pixels that represent a location in space.
- **Lines:** Lines are sequences of connected pixels that extend in a particular direction. They can be defined by two endpoints or by a point and a direction vector.
- **Line Segments:** These are finite sections of lines that have a definite starting and ending point.

- **Polygons:** Polygons are closed geometric shapes with straight sides. They can be regular (all sides and angles are equal) or irregular (sides and angles can vary). Common examples include triangles, rectangles, and pentagons.
- **Circles:** Circles are round shapes defined by a center point and a radius. They can be used to represent curves and arcs.
- **Ellipses:** Similar to circles, ellipses are elongated round shapes defined by a center point, major axis, and minor axis.
- **Curves:** Curves represent smooth or nonlinear paths. Bezier curves and splines are examples of commonly used curves in computer graphics.
- **Surfaces:** Surfaces are two-dimensional representations of shapes. These can be used to create 3D models by combining multiple surfaces.

Basic Concepts

- **Screen Size :** The physical dimensions of a screen. It is the length, in inches, of the screen from one corner to the diagonal corner.
- **Pixel:** Screens display images through pixels. A pixel, pel or dots, or picture element is a physical point in a raster image, or the smallest addressable element in raster display device; so it is the smallest controllable element of a picture represented on the screen.
- Pixels are arranged in a grid to form images on screens, such as computer monitors, TVs, and mobile devices.
- Pixels are not always the same size from device to device.
CRT
- The electron gun emits a beam of electrons (**cathode rays**).

- The electron beam passes through focusing and deflection systems that direct it towards specified positions on the **phosphor-coated screen.**

- When the beam hits the screen, the phosphor emits a small spot of light at each position contacted by the electron beam.

Electron Gun
- Heat is supplied to the cathode by the **filament**.

- The free electrons are then accelerated toward the phosphor coating by a **high positive voltage**.

Control grid

Intensity of the electron beam is controlled by setting voltage level on the control grid.
